Dyson Airblade Offers Two Ways to Save

Added November 05, 2008

According to its distributors, a new Dyson Airblade can save facility managers with five Airblades more than \$11,000 per year in paper and electricity costs.

Distributed by Cannon Hygiene USA, the Airblade actively filters incoming air to remove 99.9% of bacteria before blasting a blade of unheated air at 400 mph through an aperture the width of an eyelash.

An Airblade system costs less than \$100 per year in electricity, based on 500 uses per day, an 80 percent savings over conventional heated hand dryers. Paper savings is based on the cost of a penny per paper towel/two towels per use.

In addition, the Airblade saves time—drying your hands in 12 seconds or less.

For more information, telephone 800-582-2157, visit www.cannonhygiene.us, or e-mail info@cannonhygiene.us.
