KaiVac 1200 series by Kaivac Inc.

The KaiVac 1200 series – the KaiVac 1215 and 1250 – machines are the smallest No-Touch Cleaning systems ever developed by Kaivac Inc. The powerful machines are light and nimble, and they feature a choice of 500 psi or 150 psi to thoroughly remove surface soils and contaminants. The cleaning machines are proven to be 60 times more effective than mop and bucket at reducing bacterial contamination from floor surfaces.
