Kaivac Renews Sponsorship of Healthy Schools Campaign Guide

Part of Company's Commitment to Student Health and Learning

Hamilton, OH – May 18, 2010 - [Kaivac, Inc.](#), developer of the [No-Touch Cleaning™ system](#), has renewed its corporate sponsorship of the [Healthy Schools Campaign](#) guidebook *The Quick and Easy Guide to Green Cleaning in Schools*.

Kaivac has been a sponsor of the program since it began in 2006. This is the organizations third issue.

[The Quick and Easy Guide to Green Cleaning in Schools](#) is a multimedia guide to Green cleaning.

It includes an instructional booklet and accompanying CD-ROM comprehensively outlining the steps necessary for an educational facility to develop a Green cleaning program.

“Kaivac has been involved with healthy school cleaning programs since their inception,” says Robert Robinson, President and Founder of the company. “We strongly support what the Healthy Schools Campaign is accomplishing and want to help them in any way we can.”

There are now more than 96,000 public schools in the United States used by more than 53 million students and 5 million staff members.

“This is 20 percent of our [country’s] population,” says Robinson. “And more than half of them are in Kindergarten through eighth grade, making them the most vulnerable to [cleaning] chemical fumes and indoor pollution that can mar indoor air quality and health.”

Robinson adds that in a healthier school environment, students are more likely to stay well, as are their teachers and school staff, protecting health and the learning environment.

“In today’s world, we need to do everything possible so that our kids get a good education,” Robinson adds. “It’s not just books and qualified teachers that are needed; it’s healthy and hygienic cleaning as well. We are committed to seeing that happen.”

About Kaivac, Inc.

Headquartered in Hamilton, Ohio, Kaivac, Inc. delivers complete science-based cleaning systems designed to produce healthy results and outcomes while raising the value of cleaning operations and the dignity of the worker. The originator of [No-Touch](#) Cleaning[®], Kaivac offers an integrated portfolio of environmentally friendly cleaning products designed to remove the maximum amount of soil and potentially harmful biopollutants in the most cost-effective manner possible. For more information, visit www.kaivac.com.

About No-Touch Cleaning[®]

Designed to remove the maximum amount of soil, bacteria, and other biopollution, Kaivac's patented No-Touch Cleaning systems combine an indoor pressure washer, a powerful wet vacuum and chemistry into an integrated system. Empowering workers to hygienically clean without touching contaminated surfaces, these systems not only clean better, but also cut labor, chemical, and equipment costs while raising worker morale and image. In fact,

studies show that Kaivac's No-Touch Cleaning systems are 60 times more effective in reducing bacterial contamination on tile and grout surfaces than mops, which are more likely to spread contaminants than remove them.
