

Pro-Link Hands-Free Flush System

Added January 14, 2009

Pro-Link introduces an advanced automatic flush system designed to be dependable and programmable. The Hands-Free automatic flushing system for high-traffic restrooms can either be mounted to replace an existing toilet/urinal handle or clamped onto the existing handle.

The sensor range can be adjusted from 8 inches to 48 inches. The units come with a programmable 24-hour flush option to ensure that the toilets are flushed at least once per day. Installation involves no plumbers or water shut-off which means a restroom can become hands-free in minutes.
