**Stands Tall**

Tornado's new Marathon Carpetrinser family of upright extractors has a vertical design to minimize storage needs and improve mobility and operation.

These systems have variable psi: 100 without heat, 200 with heat, and 400 with Tornado's exclusive Perfect Heat system.

With the Perfect Heat system, the vacuum motors heat the water/cleaning solution, which is then fed into the unit's heating system, producing temperatures up to 212 degrees Fahrenheit for improved cleaning performance.

All three powerhouses have a two-stage, 1.6-horsepower vacuum motor generating up to 160 inches of static waterlift.

For more information, visit [www.tornadovac.com](http://www.tornadovac.com), or call toll-free: 800-VACUUMS.
