

WATERLESS CO.

The Advantages of
High Performance Composite urinals
when compared to Stainless Steel urinals

Advantages

Light Weight

Approximately one-third the cost

Withstands primary blows

EcoTrap(R) does not allow for foreign objects
to be put in drain opening

Full 2" interior drain

Secure locknuts can be used on flange

Easier to clean surfaces

Installed in high, medium and low security prisons,
juvenile halls, high schools and parks

More hygienic due to dryness

Model # 2004

*Now
Available!*

Urinals made with
Soybean resin,
a renewable
resource.

High Performance Composite materials may seem not as strong as stainless steel. The automotive industry and aircraft industry have proven that HPC material are stronger and have weight advantages.
