Enviro-Solutions Updates Web Site with Floorcare Calculator and Audit Tools

Peterborough, ON – [Enviro-Solutions](#), a leading manufacturer of Green cleaning chemicals and tools, has recently updated its Web site, providing floor and facility-care tools that can be used by both distributors and end customers.

The first tool is a [floorcare calculator](#). This is a rather simple though revealing spreadsheet helps visitors determine how much stripper, sealer, or floor finish they will need to complete a floorcare project.

“This could also be called a ‘savings calculator,’” says Mike Sawchuk, Vice President of Enviro-Solutions and Charlotte Products. “Many end customers purchase more chemical and [floor] finish than they need. This will help them calculate more precisely what is called for.”

In addition to the calculator, a “[Facility Survey/Audit](#)” has been added.

According to Sawchuk, the Survey/Audit is designed to “identify areas in a building that could potentially impact human health and the environment. This can also serve as a benchmark to distributors and end customers, providing a starting point as they commence their Green journey.”

Sawchuk adds that the calculator and audit were originally designed specifically for the company’s distributors; however, he encourages end customers to also take advantage of them.

“We want our [end] customers involved in the maintenance and Greening of their facilities,” he adds. “Then they can make more educated decisions, and our distributors can help them achieve their Green goals.”
